STATEMENT regarding muzzle brakes

14 November 2024

Muzzle brakes not allowed beginning January 2025

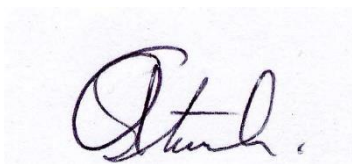

Dear Durbanville Club member,

It is with regret that the EXCO committee has decided that from January 2025, the use of muzzle brakes will no longer be allowed at the Durbanville Shooting Club.

This is as a result of the massive shopping mall development across the road that is scheduled to open in July 2025. This preventative measure to mitigate noise nuisance will hopefully extend our use of the current premises.

I trust that all our members and visitors to the range will give their cooperation in this matter.

N.B. - The only exception will be when the muzzle brake is incorporated into the design of a sound suppressor. However the use of this rifle and equipment will be up to the discretion of the duty Range Officer and EXCO members present.

Andre Stander

Chairman

Durbanville Shooting Club
